

World Ocean Atlas Upgrade

The World Ocean Atlas Viewer will be upgraded to be more effective as a classroom teaching tool. The NOAA climatology data will be updated from the 1998 set to the 2005 (the most current) set. Several teacher-requested user interface improvements will be included; and then the new viewer and all the data will be made available as a download for Mac or PC. Expected completion date: November 1, 2009.

The upgraded World Ocean Atlas Viewer can be found here [World Ocean Atlas Viewer \(http://bit.ly/ESIPwoa\)](http://bit.ly/ESIPwoa)
