

Earth Exploration Toolbook Chapter on Air Quality

TERC was one of the winners of the 2008 FUNding Friday mini-grant competition. Tamara Ledley proposed the project, which convened a team to create a new chapter on Air Quality for the Earth Exploration Toolbook (EET). The team met in January 2009 and the final chapter product is expected to be complete by the July 2009 ESIP Federation meeting.

For more information on the EET project or to see other chapters, visit <http://serc.carleton.edu/eet>.
